

## Queen Victoria Agave

*Agave victoriae-reginae*

Plant Height: 12 inches

Flower Height: 6 feet

Spread: 18 inches

Sunlight: ☉ ●

Hardiness Zone: 7

Other Names: Century Plant

### Description:

A slow growing, symmetrical variety with tight fitting deep green leaves that are edged and striped in white; margins are smooth and spineless; reddish-purple flowers when rosette matures; produces no offsets, so after flowering will need to be replaced

### Features & Attributes

Queen Victoria Agave features bold spikes of red pincushion flowers with plum purple overtones rising above the foliage in mid summer. Its succulent pointy leaves remain dark green in color with prominent white stripes throughout the year.

This is a dense multi-stemmed evergreen houseplant with a more or less rounded form. Its wonderfully bold, coarse texture is quite ornamental and should be used to full effect. This plant usually looks its best without pruning, although it will tolerate pruning.

### **Planting & Growing**

When grown indoors, Queen Victoria Agave can be expected to grow to be about 12 inches tall at maturity extending to 6 feet tall with the flowers, with a spread of 18 inches. It grows at a slow rate, and under ideal conditions can be expected to live for approximately 10 years. This houseplant will do well in a location that gets either direct or indirect sunlight, although it will usually require a more brightly-lit environment than what artificial indoor lighting alone can provide. It prefers dry to average moisture levels with very well-drained soil, and may die if left in standing water for any length of time. This plant should be watered when the surface of the soil gets dry, and will need watering approximately once each week. Be aware that your particular watering schedule may vary depending on its location in the room, the pot size, plant size and other conditions; if in doubt, ask one of our experts in the store for advice. It is not particular as to soil pH, but grows best in poor soil. Contact the store for specific recommendations on pre-mixed potting soil for this plant.

There are many factors that will affect the ultimate height, spread and overall performance of a plant when grown indoors; among them, the size of the pot it's growing in, the amount of light it receives, watering frequency, the pruning regimen and repotting schedule. Use the information described here as a guideline only; individual performance can and will vary. Please contact the store to speak with one of our experts if you are interested in further details concerning recommendations on pot size, watering, pruning, repotting, etc.

*-- THIS IS A HOUSEPLANT AND IS NOT MEANT TO SURVIVE THE WINTER OUTDOORS IN OUR CLIMATE --*
